Wheelchair Accessible Infrared Cabin

Slope: 1:12

Home Care Wall Mounted Wood Folding Seat

Wheelchair accessible sauna designs utilize a wider door and larger floor area for wheelchair turning radius according to local building codes. Hand rails are also installed for assistance with sitting on sauna benches. Many saunas in Gyms, Hotels and Health Clubs are handicap accessible to accommodate all sauna enthusiasts. We will assist with advice on new construction or remodeling jobs for any residential or commercial sauna project.

Canadian Timber

① Canadian timber is a valuable timber, which has beautiful lines, good effect of heat insulation and sound insulation, and emits a pleasant natural fragrance.

② Cedar contains rich anti-corrosive material, which has antiseptic effect and plays a special role in alleviating fatigue. With high structural stability, it is not easy to crack in case of large temperature fluctuation.

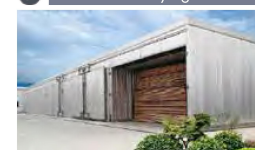

③ Cedar can reflect far infrared ray as well, so more far infrared ray can be absorbed by human body.

④ Canadian hemlock is the perfect unity of strength and appearance. Not only does it make the cabin stronger, long service life, but also it emits a natural phytoncid fragrance with effect of brain refreshing and pressure relieving.
